1. Executive Summary

Mission Statement

To democratize access to hedge-fund-level crypto trading by offering retail and institutional investors alike a secure, transparent, and profitable way to earn from professional trading activities—all through a tokenized system.

Vision Statement

To establish ourselves as the preeminent crypto-native investment fund, pioneering a new era of trust and collaboration in digital asset management. Our foundation is built upon three pillars: superior, data-driven trading strategies executed by seasoned experts; a fully transparent,

on-chain governance model that places decision-making power in the hands of our community; and an unwavering commitment to fair, automated profit-sharing that directly rewards participation.

The Opportunity

Fundtir (FNTR) is a groundbreaking, tokenized investment fund—the first of its kind globally—designed to give investors complete freedom over their capital, with no restrictions, conditions, or fixed timeframes. Unlike trading platforms or tools that require active participation, Fundtir is fully managed by a team of trading professionals with over 20 years of combined experience in cryptocurrency, foreign exchange, stocks, futures, and derivatives.

This hands-off, professionally managed investment model combines the sophistication of institutional-grade trading with the transparency and inclusiveness of decentralized finance (DeFi). Fundtir leverages time-tested risk management, innovative blockchain tools, and transparent governance to create a next-generation digital asset investment product for everyday investors.

Core Value Propositions

Professional Fund Management: Advanced, multi-strategy trading executed across spot, futures, and options markets by skilled professionals with real-time risk oversight and full operational transparency. Our approach combines high-frequency trading (HFT) for short-term liquidity capture, market and cross-exchange arbitrage, derivatives strategies (options and futures) for hedging and tactical exposure, and AI-assisted quantitative models for trend prediction and adaptive execution. These complementary strategies are governed by strict risk limits and automated controls to preserve capital and optimize net returns.

Real Profit-Sharing Model: Biannual net trading profits distribution to eligible FNTR token holders—real returns based on actual trading profits, not unsustainable token emissions.

Community Ownership via DAO: Token holders participate in key decisions such as token burns, reserve fund usage, and incentive programs through a decentralized governance system.

Investor Protections: Locked liquidity, DAO governance, and regulatory reporting offer strong protection and trust-building for the investor community.

CertiK Security Audit

The smart contracts and the entire platform have been audited by CertiK, a global leader in blockchain security. A comprehensive and continuous one-year cybersecurity protection agreement has also been secured with them to ensure the highest level of security for investor assets.

Security Audit & Cyber Protection (CertiK)

In our commitment to providing a secure and trustworthy investment environment, we are proud to announce our partnership with CertiK, a globally recognized leader in blockchain security auditing.

Comprehensive Audit: CertiK has conducted an exhaustive security audit that extends beyond the core smart contracts to include the entire platform and its system. This ensures the identification and mitigation of any potential vulnerabilities from the code to the front-end interface.

Continuous Protection: In addition to the initial audit, we have entered a one-year, renewable contract with CertiK for continuous cybersecurity protection. This agreement ensures constant monitoring of the platform's security, protection against potential threats, and a rapid response to any security incidents, thereby reinforcing long-term investor confidence in the project's security.

Independent Financial Auditing (our auditor to CROWE)

We will appoint our auditor to CROWE as our independent financial auditors. They will conduct quarterly reviews of all trading operations and financial reports, which will be publicly announced to the community. To ensure full transparency, summarized versions of these audit reports will be published for public access, while complete detailed reports will remain available to regulatory bodies and institutional partners upon request.

Financial Integrity & Compliance (our auditor to CROWE)

To uphold the highest standards of financial integrity and transparency, Fundtir has officially engaged our auditor to CROWE, a leading global accounting and advisory firm, as its independent financial auditor.

Our engagement with our auditor to CROWE includes comprehensive quarterly reviews of all our trading operations, expenses, and financial reports. The purpose of these reviews is to verify the accuracy of our financial statements and ensure that all profit distributions are correctly calculated and executed.

The results of these quarterly audits will be made publicly available to our community, reinforcing our commitment to building a fully transparent and trustworthy ecosystem.

Market Opportunity

The global decentralized finance market is projected to grow from \$32.36 billion in 2025 to approximately \$1,558.15 billion by 2034, expanding at a CAGR of 53.80%. Despite this massive growth, only a small fraction of DeFi protocols is run by professionally licensed traders or provide real-world profit sharing to investors—creating a significant market gap that Fundtir is uniquely positioned to fill.

Target Raise

\$7 million through private and public token sales to fund trading operations, liquidity provisioning, platform development, and marketing initiatives.

FNTR Token Overview

- Token Name: **Fundtir** (FNTR)
- Total Supply: **700,000,000** FNTR (fixed supply)
- Blockchain: **Ethereum** (ERC-20)
- Private Sale Price: **\$0.01** per FNTR
- Public Sale Price: **\$0.015** per FNTR

Key Differentiators

Unlike traditional crypto projects that rely on speculative tokenomics or unsustainable yield farming, Fundtir operates as a legitimate investment fund with:

- Real revenue generation through professional trading activities
- Transparent fee structure (2% annual management fee, 20% performance fee)
- Regulatory compliance with incorporation in crypto-friendly jurisdiction (BVI)
- Progressive decentralization through a four-stage DAO implementation
- Deflationary mechanisms with all unsold tokens permanently burned

Introduction & Glossary

Introduction

Dear Investor and Future Community Member,

At Fundtir, we believe in transparency, professionalism, and building genuine connections with our community. This whitepaper represents our commitment to providing you with a comprehensive understanding of our vision, methodology, and value proposition.

Unlike many crypto projects that rely on flashy graphics or speculative promises, Fundtir is built on a foundation of real-world trading expertise, regulatory compliance, and sustainable business practices. We are not just launching another token—we are creating the first truly professional, tokenized investment fund that bridges the gap between institutional-grade trading and decentralized finance accessibility.

Our team, led by seasoned financial professionals with over 20 years of combined experience across cryptocurrency, foreign exchange, and traditional markets, has designed Fundtir to address the fundamental challenges facing today's crypto investors: lack of professional management, absence of real profit-sharing, and limited access to institutional-quality trading strategies.

This document will guide you through every aspect of our project, from our Tokenomics and governance structure to our long-term vision for transforming the digital asset investment landscape. We encourage careful review and welcome any questions you may have about our approach, methodology, or future plans.

If you have any questions, feel free to reach out to us via email at info@fundtir.com or through our official social media channels. On launch day and beyond, our dedicated support team will be available to assist you directly.

Sincerely,

The Fundtir Team

Glossary

To make this whitepaper accessible and avoid overwhelming you with unnecessary jargon, we've provided clear explanations of key terms and abbreviations used throughout the Fundtir ecosystem:

\$FNTR - The native utility token of the Fundtir ecosystem, pronounced "FUN-TER"

AUM - Assets Under Management; the total market value of investments managed by the fund

Biannual Distribution - Profit-sharing payments made to eligible token holders every six months

BVI - British Virgin Islands; the crypto-friendly jurisdiction where Fundtir will be incorporated

CEX - Centralized Exchange (e.g., MEXC, Bybit, OKX)

DAO - Decentralized Autonomous Organization; a blockchain-based governance system where token holders vote on key decisions

DAO Cabinet - A treasury oversight body that executes community-approved proposals and manages the DAO treasury

DeFi - Decentralized Finance; blockchain-based financial services that operate without traditional intermediaries

DeVC - Decentralized Venture Capital; community-driven investment in early-stage blockchain projects

ERC-20 - A technical standard for tokens on the Ethereum blockchain

FNTR2 - The planned second-phase token for Fundtir's future venture capital fund expansion

Fund Management Fee - The 2% annual fee charged on Assets Under Management for operational expenses

Governance Rights - The ability for staked token holders to vote on key project decisions

Liquidity Lock – The practice of securing trading liquidity for a specified period to prevent sudden withdrawals

Performance Fee – The 20% fee charged on net trading profits before distribution to token holders

Private Sale – The initial token offering phase for strategic investors with higher minimum investments

Pro Rata – Proportional distribution based on the percentage of tokens staked by each holder

Public Sale – The open token offering phase accessible to all qualified investors

Quorum – The minimum percentage of voting tokens required for a governance proposal to be valid

Staking – The process of locking tokens to become eligible for dividends and governance participation

Staking Eligibility – The requirement to stake tokens for at least 60 days before a distribution event to receive dividends

Smart Contract – Self-executing blockchain programs that automatically enforce the terms of agreements

Token Burn – The permanent removal of tokens from circulation, reducing total supply

TVL – Total Value Locked; the aggregate value of assets deposited in DeFi protocols

Vesting Schedule – The predetermined timeline for releasing locked tokens to prevent immediate selling pressure

Yield Farming – The practice of earning rewards by providing liquidity to DeFi protocols

"Fundtir is designed for everyone—no matter your background, experience level, or investment size. We're here to democratize access to professional trading expertise and create a transparent, community-driven investment ecosystem."

— Fundtir Leadership Team

Problem Statement & Market Opportunity

The Digital Investment Challenge

Despite the explosive growth of the cryptocurrency market, retail and institutional investors face significant barriers when attempting to access professional-grade trading strategies and consistent returns. The current landscape is fragmented, risky, and often excludes the very people who could benefit most from sophisticated investment management.

Critical Problems in Today's Crypto Investment Ecosystem

High Barriers to Entry in Traditional Hedge Funds

Professional investment funds typically require minimum investments of \$1 million or more, effectively excluding 99% of potential investors from accessing institutional-grade trading strategies and risk management.

Lack of Expertise Among Retail Investors

Most individual investors don't possess the advanced trading skills, market knowledge, or time required to navigate volatile crypto conditions effectively. They're forced to rely on amateur-run trading bots or attempt manual trading with limited success.

Extreme Market Volatility and Risk

Cryptocurrency markets experience dramatic price swings that make it nearly impossible for everyday traders to manage capital effectively without professional risk management systems and strategies.

Transparency Gaps in Existing Funds

Too many crypto projects operate in secrecy, with unaudited claims, hidden fee structures, and little accountability to their investors. This lack of transparency has led to widespread distrust and significant financial losses.

Unsustainable DeFi Models

Most decentralized finance protocols rely on inflationary token emissions rather than real revenue generation, creating unsustainable yield farming models that inevitably collapse, leaving investors with worthless tokens.

Complex Entry and Exit Restrictions

Traditional investment funds often lock capital for months or years, preventing investors from reacting to changing market conditions or accessing their funds when needed.

No Real Profit-Sharing in Crypto Investment Products

While many projects promise returns, few actually share real trading profits with their community. Most rely on token price appreciation alone, which is inherently speculative.

Limited Investor Protection and Governance

Many crypto funds operate with minimal oversight, offering little to no investor protection or meaningful governance participation for token holders.

Who is Affected by These Problems?

- Individual Retail Investors who want to participate in cryptocurrency markets but lack the experience, time, or capital to access professional trading strategies.
- Traditional Investors seeking regulated, secure entry points into digital assets without the complexity and risks of direct crypto trading.
- Institutional Investors looking for compliant, transparent crypto exposure through professionally managed vehicles.
- DeFi Participants frustrated with unsustainable yield farming protocols and seeking real, profit-based returns.
- Crypto Enthusiasts who believe in the technology but want professional management rather than active trading responsibilities.

Why This Problem is Critical

"These barriers prevent millions of investors from participating in the high-growth opportunities within the crypto market. The absence of professional, transparent, and accessible crypto investment products has created a massive market gap that Fundtir is uniquely positioned to fill."

The impact extends beyond individual losses:

- Market inefficiency due to lack of professional capital allocation
- Reduced institutional adoption of digital assets
- Persistent volatility from amateur trading behavior
- Erosion of trust in crypto investment products
- Missed opportunities for portfolio diversification and returns

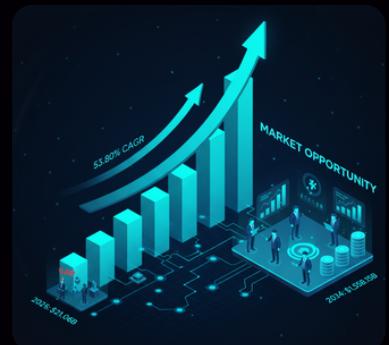

Market Opportunity & Growth Trends

Massive and Rapidly Expanding Market

The opportunity for a professionally managed crypto investment fund is substantial and accelerating:

Decentralized Finance Market Growth

- The global DeFi market accounted for \$21.04 billion in 2024
- Projected to increase from \$32.36 billion in 2025 to approximately \$1,558.15 billion by 2034
- Expanding at a CAGR of 53.80% from 2025 to 2034

Crypto Hedge Fund Performance

- According to PwC's 2024 Global Crypto Hedge Fund Report, average AUM for crypto hedge funds increased by over 45% year-over-year
- Total AUM crossed \$6.8 billion in early 2025

Digital Asset Investment Product Demand

- Coin Shares reported that digital asset investment products attracted over \$12.5 billion in inflows in the first half of 2025
- This represents a 30% increase compared to the same period in 2024

Total Value Locked Growth

- TVL in decentralized finance surpassed \$110 billion by mid-
- Reflects growing retail demand for blockchain-based financial services

The Fundtir Opportunity

Critical Market Gap Identified

Despite this massive growth, only a small fraction of DeFi protocols are run by professionally licensed traders or provide real-world profit sharing to investors. This creates an enormous opportunity for a compliant, transparent, performance-driven fund

Market Trends Supporting Fundtir's Model

Shift Toward Real Yield: The DeFi market is moving away from inflation-based rewards toward sustainable, profit-driven income —exactly what Fundtir's dividend model provides.

DAO Governance Adoption: Over 2 million unique DAO participants were recorded by Q2 2025, showing widespread adoption of community governance across DeFi.

Tokenized Fund Growth: Tokenized fund models are expected to reach \$16 trillion in AUM globally by 2030, according to Boston Consulting Group, with early movers gaining significant competitive advantages.

Increased Regulatory Clarity: Jurisdictions such as the EU (MiCA), Hong Kong, and Dubai are introducing frameworks that legitimize crypto fund structures, creating opportunities for compliant players like Fundtir.

Fundtir's Unique Market Position

By positioning itself as a compliant, transparent, and performance-driven fund, Fundtir addresses this unmet demand directly by offering:

- Institutional-quality trading managed by experts with 20+ years combined experience
- Open access through a tokenized structure with no minimum investment barriers
- Real profit sharing through biannual dividends derived from actual trading performance
- DAO-powered governance giving users meaningful decision-making power
- Comprehensive investor protections through liquidity locks and regulatory compliance
- Transparent operations with audited smart contracts and regular performance reports

Market Validation

As the digital asset market matures, investor expectations are shifting from speculative, high-risk opportunities toward more structured, reliable, and transparent financial products. This growing demand presents a multi-billion-dollar opportunity for solutions that combine traditional asset management professionalism with blockchain-enabled accessibility and community governance.

Fundtir represents the convergence of these trends—professional trading expertise, DeFi accessibility, regulatory compliance, and community ownership—positioning us to capture significant market share in the rapidly expanding tokenized investment fund sector.

4. The Fundtir Solution

Introducing a Revolutionary Investment Framework

Fundtir introduces a modern investment framework that combines expert trading execution with decentralized access and control. By removing traditional entry barriers, we enable both institutional and retail participants to benefit from a high-performance digital asset fund governed transparently through blockchain technology.

Our solution bridges the critical gap between institutional-grade trading sophistication and DeFi accessibility, creating the world's first truly professional tokenized investment fund with complete investor freedom and community governance.

How Fundtir Solves the Investment Challenge

"Fundtir solves these issues through a transparent, professionally managed digital trading fund that allows investors to participate securely, with the ability to access their capital at any time."

Instead of forcing investors to choose between amateur-run protocols and inaccessible traditional funds, Fundtir offers a third way: professional management with decentralized accessibility.

Core Solution Components

1. Professional Fund Structure

- Structured as a professionally managed crypto trading fund
- Registered in crypto-friendly legal jurisdiction (BVI)
- Fully licensed and compliant operations
- Real-time risk oversight and management

Investor Protection Framework in the BVI

The British Virgin Islands (BVI) regulatory environment provides structured investor protection mechanisms similar to those of other reputable jurisdictions. The BVI Financial Services Commission (FSC) enforces clear requirements for fund registration, asset segregation, and AML compliance. While offering flexibility for digital asset management, the BVI's legal system ensures investor safeguards comparable to regions like Malta and Singapore, including transparent fund reporting, independent audits, and recognized dispute resolution procedures.

2. Expert Trading Execution

Our trading desk uses a mix of professional strategies designed to perform across different market conditions:

- High-frequency trading (HFT) captures short-term market inefficiencies and liquidity opportunities.
- Arbitrage takes advantage of price gaps between exchanges and trading pairs.
- Derivatives trading uses futures and options for hedging and tactical positioning.
- AI-driven quantitative models identify trends and optimize portfolio performance.

3. Transparent Profit Distribution

- Biannual profit distribution to staked token holders
- Real returns based on actual trading performance
- Clear fee structure: 2% annual management fee, 20% performance fee
- No unsustainable token emissions or artificial yields

4. Community-Driven Governance

- DAO governance allows token holders to propose and vote on key decisions
- Staking model encourages long-term holding and stability
- Democratic decision-making on fund allocation and strategic development
- Progressive decentralization through four-stage implementation

5. Investor Protection Mechanisms

- All unsold tokens permanently burned to reduce supply
- Liquidity locked for 12 months to protect investor confidence
- Regular performance reports and smart contract audits for full transparency

Separation of Institutional Oversight

To reinforce Fundtir's institutional rigor, we maintain a clear separation of operational duties and oversight responsibilities to prevent conflicts of interest and ensure robust compliance, even during the initial, centralized phase of management:

- **Trading Management (The First Line of Defense):** The trading team focuses solely on optimal strategy execution and strict adherence to the defined 4% Institutional Stop-Loss limit.
- **Financial Compliance & Treasury:** Led by M. Khairul Hafiz Mustaffa, this department operates independently to ensure regulatory adherence, manage treasury reserves, and prepare all financial reports for the external auditor (our auditor to CROWE).
- **External Security Validation:** Continuous network monitoring and external audits by CertiK provide an impartial third layer of oversight, ensuring trading logic and asset contracts remain secure and uncompromised by the management team itself.

Fundtir Investment Journey

This creates a self-reinforcing ecosystem where professional performance drives community value, and community governance ensures alignment with investor interests

Key Differentiators of Fundtir's Success

Technology Infrastructure

Ethereum-Based Smart Contracts

- ERC-20 token standard ensures universal compatibility
- Audited smart contracts for transparent staking and distribution mechanisms
- Automated dividend distribution through programmable contracts

Multi-Signature Security

- Enhanced security through multi-signature wallet systems
- Protected fund management with distributed key control
- Institutional-grade custody solutions

Governance Technology Stack

- Off-chain voting through Snapshot.org integration
- Progressive transition to on-chain governance
- Transparent proposal and execution systems

Competitive Advantages

Market Positioning

Fundtir occupies a unique position in the market as the first professionally managed, fully compliant, tokenized investment fund offering:

- Institutional expertise with retail accessibility
- Real profit sharing from actual trading performance
- Democratic governance through DAO participation
- Regulatory compliance with investor protection
- Transparent operations with audited smart contracts
- Global accessibility without geographic restrictions
- No minimum investment barriers for public participation

Sustainable Business Model

- Our revenue model is based on proven fund management principles:
- Management fees provide stable operational funding
- Performance fees align our interests with investor success
- Token appreciation benefits all ecosystem participants
- DAO treasury supports long-term development and governance

Risk Management Framework

Trading Risk Controls

- HFT systems follow strict position limits and daily profit/loss caps.
- Arbitrage strategies maintain capital buffers to manage cross-exchange risks.
- Derivatives desks monitor delta/gamma exposure and adjust margins dynamically.
- AI models undergo regular retraining, stress testing, and model-risk reviews.

Operational Risk Mitigation

- Regulatory compliance reduces legal and operational risks
- Smart contract audits minimize technical vulnerabilities
- Multi-signature controls prevent unauthorized fund access

Market Risk Management

- Professional trading strategies designed for various market conditions
- Hedging strategies to protect against extreme volatility
- Conservative leverage and exposure limits

Success Metrics and Accountability

Performance Transparency

- Monthly performance reports shared with community
- Real-time fund metrics available through dashboard
- Annual third-party audits of fund operations

Community Accountability

- Regular AMAs with fund management team
- Open governance proposals and voting records
- Transparent fee reporting and profit distribution records

Regulatory Compliance Tracking

- Monthly compliance updates via official channels
- Jurisdictional reporting alignment
- Ongoing legal counsel consultation

"Fundtir is not just another crypto project—it's a fundamental reimagining of how professional investment management can be made accessible, transparent, and community-driven while maintaining the highest standards of performance and compliance."

Through this comprehensive solution, Fundtir transforms the traditional investment fund model into a decentralized, transparent, and profitable ecosystem that serves both individual investors seeking professional management and institutions requiring regulatory compliance and proven performance.

5. Product & Services Overview

Comprehensive Blockchain-Powered Investment Suite

Fundtir delivers a unified suite of blockchain-enabled financial tools built on proven investment methodologies. Our platform is designed to generate real economic value for token holders through profit-sharing, active community participation, and transparent on-chain governance.

Every feature is crafted to align the interests of the fund with those of its community, ensuring lasting value and security for all stakeholders.

The FNTR Token: Gateway to Fundtir's Ecosystem

At the heart of Fundtir is the FNTR token, an Ethereum-based (ERC-20) utility token. FNTR provides holders with:

- Access to fund performance-based dividends
- Eligibility for staking rewards and governance participation
- Voting power in the Fundtir DAO
- Entry to long-term community incentive programs

FNTR Ecosystem Structure

Key Technology and Service Features

Audited Ethereum Smart Contracts: Secure, automated management of tokens, profit distributions, and governance votes.

Multi-signature Wallets: Institutional-grade security for fund operations and treasury management.

Performance Dashboards: Real-time tracking of fund performance staked tokens, and dividend calculations.

Benefits to Token Holders

Passive Income: Earn real dividends from professional fund trading, not from speculative token inflation.

Note: Dividends are derived from realized net trading profits generated by the fund's multi-strategy trading framework (HFT, arbitrage, derivatives, and AI-assisted quantitative models), after fees and reserves.

Governance Power: Influence major fund decisions and participate in project upgrades and strategic changes.

Community Incentives: Receive bonuses, airdrops, and recognition for active DAO participation.

Security & Compliance: Operate in a compliant, transparent environment with ongoing external audits and regulatory reporting.

Fundtir's product suite is designed to set a new standard for digital asset management—combining professional trading expertise, secure blockchain technology, and community-driven governance to create a sustainable, rewarding ecosystems for all investors.

6. FNTR Token Specifications

Overview

The FNTR token is the backbone of the Fundtir ecosystem, facilitating investment access, profit sharing, and decentralized governance for all participants.

Token Details

Specification	Detail
Token Name	Fundtir
Token Ticker	FNTR
Total Supply	700,000,000 FNTR (fixed supply)
Blockchain	Ethereum (ERC-20 Standard)
Private Sale Price	\$0.01 per FNTR
Public Sale Price	\$0.015 per FNTR

Utility Functions

Revenue that funds distributions is generated from the fund's professional trading operations, which utilize a combination of HFT, arbitrage, derivatives trading, and AI-driven quantitative strategies.

Dividend Eligibility: Only FNTR token holders who stake their tokens for at least 60 days prior to a distribution event are eligible to receive biannual profit shares from the fund's net trading profits.

DAO Governance Power: Staked tokens grant holders voting rights in the Fundtir DAO, allowing participation in strategic decisions including treasury allocations, token burns, marketing incentives, and upgrades.

Deflationary Mechanism: All unsold tokens from both private and public sales are permanently burned, reducing supply and potentially strengthening long-term token value.

Liquidity Protection: 25% of the liquidity raised in the public sale will be locked for 12 months on decentralized platforms, ensuring a secure trading environment for investors.

Staking Incentives: Only staked tokens confer governance rights and dividend eligibility, encouraging long-term holding and ecosystem stability.

Token Allocation Breakdown

Allocation	Percentage	Amount (FNTR)	Notes
Private Sale	15%	105,000,000	15% released at Token Generation Event (TGE). The remaining 85% is subject to an 11-month lock-up period, followed by linear monthly vesting over 3 months.
Public Sale	45%	315,000,000	Directly via the Fundtir platform.
Founding Team	15%	105,000,000	Tokens are locked for the first 12 months following TGE, followed by linear monthly vesting over the subsequent 12 months.
Marketing/Rewards	10%	70,000,000	Incentives and partnerships
Reserve/Operations	15%	105,000,000	Liquidity and buybacks

- ALL VESTING SCHEDULES ARE ENFORCED VIA SMART CONTRACTS TO ENSURE TRANSPARENCY, PREDICTABILITY, AND LONG-TERM ECOSYSTEM ALIGNMENT.

Security and Compliance

- ERC-20 smart contracts will be audited by reputable third-party firms.
- KYC/AML checks mandatory for all private sale participants.
- Fully compliant with the regulations of crypto-friendly jurisdictions (e.g., BVI).
- No equity ownership: The FNTR token delivers utility and governance rights not company ownership or guaranteed returns.

Additional Features

On-chain transparency: Token balances, distribution, and burns are verifiable on the Ethereum blockchain.

Wallet compatibility: Compatible with all ERC-20 wallets (MetaMask, Trust Wallet, Ledger).

Future expansion: The FNTR token will serve as the gateway to ecosystem upgrades, future product launches, and eventual integration with additional decentralized financial products.

The FNTR token is designed as a true utility asset—unlocking participation, profit-sharing, and community governance within Fundtir's secure, transparent, and scalable ecosystem.

7. Tokenomics & Distribution

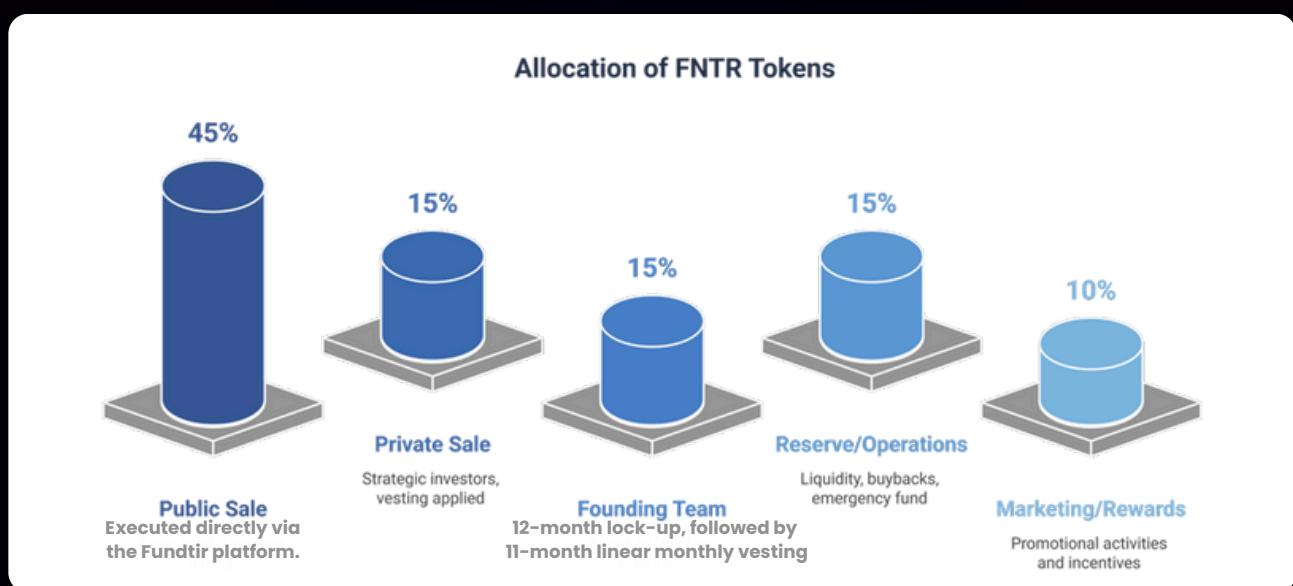

Tokenomics Philosophy

Fundtir's tokenomics are designed to support long-term investor value, market stability, and decentralized governance. The FNTR token isn't just a digital asset—it's a financial instrument that unlocks profit-sharing, governance, and staking rewards. The distribution model delivers clarity, fairness, and transparency to both retail and institutional investors.

Total Supply & Structure

FNTR Total Supply: **700,000,000** (fixed; never increased)

Blockchain: **Ethereum** (ERC-20 Standard)

Token Vesting and Lock-Up Schedule

Public Sale Duration

The public sale period will not exceed 120 Days and may be concluded earlier at the project's discretion based on market conditions and demand.

Utility & Distribution Benefits

Fund Access: Token holders gain direct exposure to professional fund performance and dividend participation.

DAO Participation: Staked FNTR confers governance/voting rights, letting holders shape the treasury, burns, and future product development.

Staking & Rewards: Only staked tokens are eligible for profit-sharing, bonus campaigns, and DAO incentives.

Transparency: All allocations, burns, and releases are verifiable on-chain; smart contract audits ensure compliance.

Rationale

This balanced structure maximizes decentralization, ensures team alignment with project success, provides ongoing operational resources, incentivizes community participation, and establishes Fundtir as a trusted, transparent digital asset investment platform.

Fundtir's tokenomics prioritize fairness, investor protection, and sustainable value, laying a strong foundation for the world's first professional, community-owned crypto investment fund.

8. Business Model & Revenue Streams

Business Model Overview

Fundtir's business model seamlessly integrates professional asset management, decentralized token economics, and community-driven governance. By leveraging blockchain technology and expert trading strategies, Fundtir offers investors an accessible yet institutional-grade investment solution with transparent operations and real, recurring income.

How Fundtir Generates Value

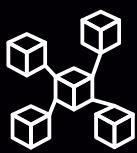

Fundtir operates as a tokenized hedge fund, pooling capital from FNTR token holders and deploying it across a portfolio of disciplined, professional trading strategies. Our execution framework blends high-frequency trading (HFT) for short-term opportunities, arbitrage to exploit cross-market price inefficiencies, derivatives strategies (futures and options) for hedging and amplified exposure when appropriate, and AI-driven quantitative models that inform medium-to-longer term allocation and signal timing. This multi-strategy approach aims to generate consistent net trading profits while minimizing drawdowns through conservative position sizing, volatility-aware risk controls, and automated execution safeguards.

- **Active Fund Management:** The team executes trades using proven methodologies, advanced risk management, and real-time oversight to maximize returns and minimize risk.

- **Tokenized Access:** Investors participate by holding (and staking) FNTR tokens, enabling entry without the high minimums or restrictions of traditional finance.

- **Decentralized Governance:** Significant decisions, including treasury usage and incentive programs, are proposed and voted on by FNTR stakers, aligning interests with the community.

Fund Operations Revenue Streams

Revenue Stream	Details
 Management Fee (2%)	2% annual fee on AUM
 Performance Fee (20%)	20% fee on net trading profits
 Token Sale Proceeds	Capital raised from token sales
 Reserve Tokens Usage	15% reserve fund allocation
 Burned Tokens	Unsold tokens are permanently burned
 DAO Treasury Allocation	10% of net trading profits
 DEX/CEX Listing Earnings	Liquidity provision on exchanges
 DeFi/Staking Integrations	Funds deployed in DeFi protocols

How Revenue Benefits Token Holders

Dividends: After fees, net trading profits are distributed biannually to eligible FNTR stakers.

Definition of Net Profit and Distribution

Net Profit for the purpose of the semi-annual FNTR token holder distributions is defined as: **Total Realized Trading Profits, minus Management Fees (2%), Performance Fees (20%), and specifically itemized direct operating expenses.**

- **Direct Operating Expenses include:** Gas Fees, Exchange Fees, and the annual security and financial audit costs (CertiK & our auditor to CROWE).
- **Cost Transparency:** An annual ceiling for Direct Operating Expenses will be proposed and voted upon by FNTR token holders via the DAO, ensuring transparency and safeguarding distributed returns.

Incentive Programs: DAO-managed treasury is used for airdrops, staking campaigns, and governance rewards.

Token Value Support: Strategic buybacks and permanent burns help maintain scarcity and price appreciation.

Sustainability Focus

All revenues and expenditures are transparently reported to the community. By combining real fund performance with accountable token economics and community governance, Fundtir delivers a scalable, sustainable business model built for long-term success.

Fundtir's robust, multi-channel revenue model aligns the interests of professional fund managers, token holders, and the broader crypto ecosystem—creating lasting value for all stakeholders.

9. Governance & DAO Framework

Decentralized, Transparent, Community-Driven Governance

Fundtir's governance is anchored in a Decentralized Autonomous Organization (DAO), empowering FNTR token holders to directly shape the fund's trajectory, operations, and ecosystem development.

Through a progressive rollout, Fundtir transitions from a professionally managed fund to a truly community-owned investment platform.

DAO Rollout: Four-Stage Implementation

Stage	Milestone	Target Quarter	Purpose
1	Governance Framework Launch	Q1 2026	Establish DAO structure; define proposal and voting eligibility mechanisms
2	Voting Activation (Snapshot)	Q1 2026	Enable community proposal review and off-chain voting rights
3	DAO Cabinet Activation	Q2 2026	Form a multi-signature treasury council to execute community-approved proposals, manage funds
4	Full On-Chain DAO	Q4 2026	Transition all governance processes to on-chain smart contracts for true decentralization

DAO Transition Rationale & Interim Safeguards:

The gradual DAO rollout over multiple quarters ensures operational stability, regulatory alignment, and investor protection during Fundtir's decentralization process. A rapid transition could expose governance systems to exploitation or decision-making inefficiencies.

During the interim stages, community interests are safeguarded through:

- Multi-signature treasury control, requiring approval from both team and community representatives.
- Regular transparency reports summarizing all fund and governance activities.
- Snapshot-based advisory voting, allowing community feedback before full on-chain governance activation.

This measured approach balances decentralization goals with the need for accountability, technical maturity, and compliance readiness.

Governance Features & Participant Rights

Proposal Submission: Any address holding or delegated >0.25% of FNTR supply may submit proposals for review.

Community Feedback: Discussion periods (5-7 days) in forums for refining proposals.

Voting Period: Proposals are voted on over 3-5 days using staked tokens, either off-chain (Snapshot.org) or on-chain.

Quorum Threshold: Minimum 5% of circulating FNTR supply must participate for any vote to be validated.

Majority Approval: Simple majority (>50%) required for most decisions, enabling fair and efficient governance.

Execution: DAO Cabinet executes approved decisions, gradually shifting to full smart contract-based automation.

Treasury Oversight & Community Funding

DAO Cabinet: Trusted representatives (from team + community) oversee treasury, disburse grants, and manage protocol upgrades.

Treasury Funding: 10% of fund trading profits are allocated to the DAO treasury for ecosystem development, grants, and community initiatives.

Transparent Audits: Treasury balances, expenditures, and grant allocations are published regularly for public verification.

Key Decision Areas Managed by the DAO

- Allocation of treasury funds for growth, incentive programs, and technical upgrades
- Token burn rates and deflationary measures
- Strategic marketing and expansion campaigns
- Proposal of new trading strategies or asset classes
- Updates and upgrades to fund smart contracts and protocol infrastructure
- Governance and compliance mechanisms

Voting Power & Incentives

Token-Based Governance: Voting rights depend on the amount of staked FNTR tokens; the more staked, the greater the influence.

Staking Incentives: Active governance participation may be rewarded with bonuses or recognition in Fundtir's community.

Reputation & Inclusion: Mechanisms to encourage broad participation and avoid concentration of power among large holders

10. Development Roadmap

Stage 1 – Foundation & Initial Growth (Q3 2025 – Q4 2026)

Fundtir's first stage establishes the foundational infrastructure, community governance framework, and market presence necessary for sustainable growth and decentralization.

Q4 2025 – Initial Coin Offer Launch

The Initial Coin Offer (ICO) launches, combining private and public sale phases to raise capital from strategic investors and the broader community. Vesting schedules are implemented to ensure aligned incentives across all stakeholder groups.

Q3 2025 – FNTR Token Development

The development phase focuses on architecting and building the FNTR token with comprehensive security measures. Smart contracts are designed for staking mechanisms and governance participation, ensuring compliance with leading blockchain standards and security protocols.

Q4 2025 – Smart Contract Deployment

All Ethereum smart contracts are deployed and undergo rigorous third-party audits. The FNTR token enters its operational phase with staking mechanisms activated, enabling token holders to participate in the early governance framework.

Q1 2026 – Public Sale Launch via Fundtir Platform

The FNTR token enters its public sale phase conducted exclusively through the Fundtir platform.

This milestone marks the transition from private distribution to broader public participation and community engagement, while maintaining controlled execution and compliance.

Q1 2026 – DAO Framework Deployment

The foundational DAO governance structure (Stage 1) is deployed, introducing community voting mechanisms and proposal creation features. Community forums are launched for transparent discussion and collaborative decision-making on protocol development.

Q2 2026 – Tier 1,2 Centralized Exchange Listing

Fundtir secures listings on major centralized exchanges including MEXC, Bybit, and OKX, significantly expanding market accessibility and liquidity. Enhanced trading volume and institutional investor participation accelerate ecosystem growth.

Q3 2026 – First Profit Distribution & DAO Cabinet

The first biannual dividend distribution occurs, rewarding staked token holders with profits from fund performance. The DAO Cabinet is activated to manage treasury operations and execute community-approved proposals, representing a major governance milestone.

Q3 2026 – DAO Cabinet Activation

The DAO Cabinet becomes fully operational, taking on treasury management responsibilities and proposal execution functions. This structure balances community-driven decision-making with professional fund stewardship.

Q4 2026 – Full On-Chain DAO Implementation

Complete decentralization is achieved as all governance, voting, and proposal execution processes transition fully on-chain via smart contracts. Fundtir reaches community self-sustainability with transparent, immutable governance operations.

11. Future Vision Beyond 2026

Stage 2 – Ecosystem Expansion & Decentralization (Q1 2027 – Q4 2029)

The second stage builds upon Stage 1 foundations to create a fully autonomous, globally scaled ecosystem with advanced financial products and cross-chain interoperability.

Q1 2027 – Technical Preparation & Initial Marketing

Develop and audit the second-generation smart contracts for enhanced functionality and security. Build the new dashboard, allowing contributors from the first project to log in using the same username and password, ensuring seamless user experience. Launch the marketing campaign in mid-Q1 2027, focusing on digital outreach, media relations, and investor community building. Continue development and technical testing throughout Q1 and Q2, with full completion by the end of Q2 2027.

Q2 2027 – Unified Token Sale Launch

Begin the Unified Token Sale, combining both private and public sale phases under one transparent framework. Open participation to all investors through tiered pricing and verified registration. The token sale continues through the end of Q3 2027.

Q3 2027 – Sale Completion & DAO Governance Activation

Close the Unified Token Sale by the end of Q3 2027. Finalize and integrate the DAO governance system within the dashboard. Enable investor voting, proposal creation, and participation features.

Q4 2027 – Centralized Exchange Listing & System Activation

List the FNTR token on centralized exchanges such as MEXC, Bybit, and OKX. Activate the governance system through smart contracts and the dashboard interface. Publish the first annual report, summarizing financial and operational performance.

Q1 2028 – Commencement of Official Trading

Begin active trading of the FNTR token across centralized and decentralized markets. Monitor liquidity levels, trading volumes, and post-listing performance. Launch incentive and loyalty programs to strengthen community engagement and market stability.

Q2 2028 – Transparency & Financial Reporting

Release quarterly financial reports covering fund performance and trading results. Enhance the dashboard with real-time analytical tools and investor insights. Prepare for the first semi-annual profit distribution.

Q3 2028 – First Profit Distribution

Execute the first official profit distribution to eligible investors based on actual fund performance. Launch reward and incentive programs through the DAO. Conduct a comprehensive internal performance review to prepare for the next growth phase.

Q4 2028 – Strategic Review & Growth Planning

Conduct a comprehensive performance review after the first full year of trading. Update the investment strategy based on digital analytics, market trends, and investor feedback. Begin outlining the next-generation roadmap, focusing on scalability and cross-chain functionality. Onboard new institutional partners and prepare for regulatory expansion into additional markets.

Q1 2029 – Product & Service Expansion

Expand the investment portfolio to include new asset classes such as tokenized securities, commodities, and DeFi indexes. Launch Fundtir Labs as a dedicated research and innovation center to develop advanced strategies and tools. Release Dashboard 2.0, featuring advanced analytics and greater community interaction.

Q2 2029 – Integration & Strategic Partnerships

Establish strategic partnerships with leading FinTech firms, DeFi platforms, and global blockchain projects. Achieve operational interoperability across Ethereum, BNB Chain, and Solana to ensure cross-chain liquidity. Introduce staking programs and liquidity pools tailored for institutional investors. Host the first Global Fundtir Summit, uniting partners, investors, and advisors worldwide.

Q3 2029 – DAO Autonomy & International Expansion

Complete the transition to a fully autonomous DAO, where all fund operations are executed via smart contracts without centralized control. Implement full decentralization in treasury management and governance decisions. Expand into Asian and European markets through the establishment of regional DAO councils. Launch a Global Compliance Framework aligned with international regulations such as MiCA (EU).

Q4 2029 – Final Evaluation & Phase Conclusion

Conduct a comprehensive final evaluation of Phase 2's performance, covering financial results, governance maturity, and market expansion. Publish the 2029 Annual Report, detailing growth metrics, strategic partnerships, and global community impact. Review and refine the expansion strategy to identify priorities for the upcoming phase, including asset diversification and service innovation.

12. Team & Leadership

Experienced Leadership Driving Fundtir's Success

Fundtir is led by a multidisciplinary team combining decades of financial experience, advanced trading expertise, and institutional-grade governance. This structure ensures specialization, efficiency, and full operational transparency.

Leadership & Management

Michael Charlton – Co-Founder & Strategic Advisor:

An FCA-qualified chartered accountant and veteran financial strategist. With over 40 years of experience in corporate finance and fund structuring, he leads a network of senior traders who execute the professional trading strategies.

M. Khairul Hafiz Mustaffa — Head of Corporate Finance & Treasury:

A senior finance executive with 15+ years of experience in corporate banking and investment strategy. He specializes in regulatory compliance, liquidity management, and ensures financial reporting meets the highest international standards.

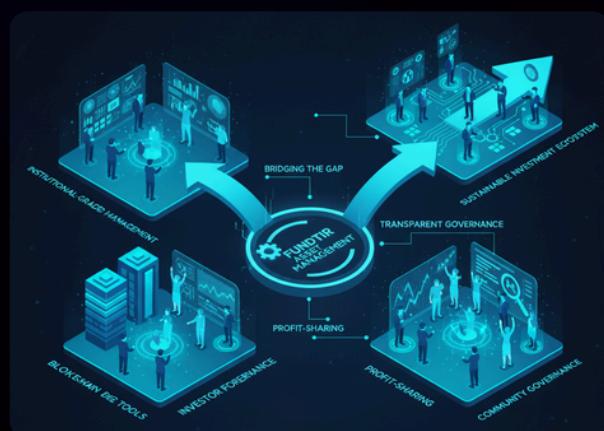

Strategic Collaborations and Audit Oversight:

- **Technology Partner (Code Brew Labs):** Oversees the end-to-end development of Fundtir's smart contracts, trading platform, and security infrastructure.
- **Security & Smart-Contract Auditor (CertiK):** Contracted to audit smart contracts and provide continuous network monitoring through its Skynet system, guaranteeing real-time protection.
- **Financial & Accounting Auditor (our auditor to CROWE):** Will be appointed as the independent financial auditor to conduct quarterly audits and verify fund performance statements, ensuring full compliance with global accounting standards.

13. Conclusion

Fundtir represents a paradigm shift in digital asset investment by combining the rigor of institutional-grade professional fund management with the transparency, flexibility, and inclusiveness of decentralized finance. Through our transparent governance framework, real profit-sharing mechanisms, and commitment to regulatory compliance, Fundtir offers investors a secure and rewarding pathway to benefit from the rapidly growing cryptocurrency and digital asset markets.

By democratizing access to expert trading strategies and empowering our community through progressive DAO governance, we are building not just a fund, but a sustainable investment ecosystem driven by collective intelligence and aligned incentives.

We invite you to join us on this transformative journey. Together, we will redefine decentralized asset management and unlock new horizons of opportunity for everyday and institutional investors alike.
